mobile phone games don't belong on steam, EVER !!!!

this is a HUGE waste of time and money.. A really good mahjong game with tons of challenging levels. Even though it's still in early access, it's already available to play in both VR and standard modes. The soundtrack and the tile design just sets the perfect atmosphere for the game.. i may play it again. The Devs aren't updating it anymore. Don't buy this game.. This is a review from Ali the MLG Brony-

I had so much fun with this game it's amazingb it's likeb the sims but with amazing gasm0elasy...

Pros

-Simple

-Ponys!

-cute

-Lots of hours of bentertainment

-cheap

Cons

-None this is flawless

Please dont hate this is my opinion also BROBNYS 4 LYFE!. I used to play this game a lot when I was twelve years old. Already a rabid simulator, god, and tycoon game player at that age, this game brings back memories of arranging flights and watching the money pouring in. Taking care of oil supplies, maintenance, staff, and the company image makes this game feel like you are taking care of an airline company in this quirky version of our world. Parsed from spreadsheets like other sim games, this game harkens back to the era simpler simulated games. Already complex with the element of distance, plane range, maintenance, etc., this is still a fantastic simulator worth playin0g, even with its age.

However, that doesn't detract the fact that the game's age is showing. The crashes happening at the 4 hour mark reminds me of my youthful frustration of time sunk into the game and the real need of a more adjustable frequency of autosaves. The causes of the crash ranges from the music changing to just plain old, old coding that seems to be unfixable. Even with saves, you need to save multiple files and at various junctures to avoid creating cariables that ed to the crash in the first place. It is unfortunate that this game with it being almost two decades old does not have the developer support, but the undying love from the fans. (And this is with the advent of Airline Tycoon 2 which I will review at a later time, grouses and all.)

In conclusion, this is a fantastic game I would highly recommend even with my low playtime exhibited here. My childhood was this game. Almost became an airline pilot because of it. However, I prefer the cockpit than the mudpit during basic training leading to this inevitable review of me reliving a life of piloting the air.. This is the first 2d auto scrolling platform I have played that has ever had lag. The screen stutters, sometimes my inputs drop. But it has easy achievements. Not very worth it honestly.. Feels like gmod, half life, and half life 2 mixed together. i love it its very fun. Great game to play on the HTC Vive. Very few issues while playing the game and is very enjoyable. Feels very similar to real table tennis but the game does take a little while to get used to. After about half an hour of playing the game gets a lot easier, plus the extra games modes make the game even better.. Dumbest off road game ever...camera angles suk...can't move on unless you finish all tutorials...can't play internet games as other players can't see the game that's been set up...worst \$.74 ever spent!!!

I hope this game die

Its a lame copy for Clash of Clan

And its Pay2Win. Takes a lot of the tropes of a "standard" tower defence game and makes them better. Lots of these traps feel very tactile, because of the way they push, pull, or drag the creeps - rather than just making a number of abstract HP tick down. If you don't like tower defence games, there's no reason you're likely to like this one, either. But if you like the genre, this and the Creeper World series are IMO the peak of the genre.. The Story, the graphics and the open world are new milestones in Game Business. Better than EA because no DLC\updates, everything is in the Game from the beginning. Everyone that loved the first RTR as much as i did, will love this one too.

Keep up the good work Spell Helix. :). absolute trash. Cheap World of Goo rip off with none of the original's creativity or artistry. 0/10 I want my 5 minutes back.. I was EXTREMELY excited to download and purchase this game. I played for a little bit and then i noticed the gamma was crap, tried lowering it and it WOULD NOT LOWER!!!!!! But onto gameplay, The gameplay is a bunch of Cattle poop and the fact that the steering is bad. Im trying to steer a Potato harvester into a field and the stupid thing oversteers and hits another car. Farming simulator 19 added cab suspension and John Deere, i was happy when they did but aside from that IT TOOK THEM 11 YEARS TO DO IT!!! theres other reasons why i dislike this but Buy FS17 not FS19. This game - was the business partner of - your mother - and - your dog - and wait til you read the Steam reviews!
